

1. Unique and Humorous captions for Instagram meme pages

As an owner of a 1m+ Instagram account that specializes in meme creation, I want to develop captions that stand out for our viewers. Generating good meme posts can be a challenge at times for our scale of users and additional creation of captions can be a burden to our Instagram page team. We have tried to maintain the creative energy we have had with the captions from the initiation of our instagram page but our team and the viewers of our content have seen a downward trend in caption quality. Through the use of the GPT-IG bot, we can further enhance our teams ability to produce quality captions again. This will lead our page to develop a better page-to-viewer relationship as well as spark a growth in new followers for the page.
